

ASC-3420

Tar and Asphalt Remover /
Emulsifiable Degreaser

REMOVES TAR | QUALITY | NO RESIDUE

ASC-3420 is a superior quality, high powered cleaner specially designed for extra hard to clean soils. ASC-3420 covers the entire spectrum of cleaning.

ASC-3420 will “attack” the toughest petroleum-based problems, the grease and grime will loosen, and will begin to run off immediately. Unlike other solvent based products, ASC-3420 leaves no film, residue, or offensive odors during use, or after the area has been cleaned. ASC-3420 has the unique ability to penetrate to the problem, and “Loosen and Lift” the soils from the surface to be cleaned.

PHYSICAL PROPERTIES

Property	Value
Physical State	Amber Liquid
Halogen Content	None
pH (1% dispersed)	6-8
LD ₅₀	>30,000 ppm
Flash Point	>100°F
Pour Point	>-300°F
Density	7.66 lbs/gal

For Tar an Asphalt Removal: Apply ASC-3420 to tar/asphalt soiled surface. This may be done with a brush or spray applicator. Allow sufficient time for penetration and rinse with water. It may be necessary to agitate surface to effect quicker removal. When used as directed ASC-3420 will not harm painted surfaces. ASC-3420 is recommended for the removal of protective cosmoline transport coating found on new, import automobiles, road tar, and asphalt from fine painted surfaces without any affect to the surface.
