

# Gold Fury

Truck and Car Wash and Automatic  
Presoak

BIODEGRADABLE | HEAVY DUTY | ALKALINE BASED

Gold Fury Truck and Car Wash represents a revolution in cosmetic cleaning of transportation equipment. Gold Fury Truck and Car Wash quickly and easily cleans vehicles, removing hard-to-break road films in a single step application. Gold Fury Truck and Car Wash cleans all types of transportation equipment from painted surfaces such as cabs and vans to aluminum and stainless steel trailers.

## PERFORMANCE PROPERTIES

- Lowest Cleaning Cost Per Unit
- Best Appearance In The Industry
- Safe for Painted Surfaces
- Will Not Damage Decals
- Can Be Used On Stainless Steel
- Safe For Your Personnel

Gold Fury is offered in 275 gallon tote tanks, 55 gallon drums, or 5 gallon pails.

## Gold Fury

**Gold Fury is a dark yellow liquid with a pleasant odor. It is an alkaline product that is totally biodegradable and free rinsing. It is formulated to be self demulsifying so as to allow skimming of removed oils and greases in order to minimize the burden of effluent treatment systems. Unlike many competitive products, the use of Gold Fury Truck and Car Wash does not expose personnel to toxic or dangerous components such as those found in most competitive products.**

### RECOMMENDED DILUTION

Gold Fury Truck and Car Wash should be diluted prior to use, and applied as follows:

The minimum dilution is 25 parts water to 1 part cleaner; the maximum effective known dilution is 100 parts water to 1 part cleaner. A metering device is recommended to assure proper usage. Step-wise dilution may be used to accomplish the desired end dilution. The dilute solution should be applied directly to the surface to be cleaned with a high pressure cleaner, using either a cold or hot water washer. The solution should be left on the vehicle 5-10 minutes and then rinsed with a high pressure water only rinse.

Gold Fury Truck and Car Wash can be used as the second step in "two-step" washing operations. When this is done, our Super Bright C, diluted a minimum of 10 parts water to 1 part brightener, is typically used as the first step. The washing procedure is to apply the first step solution to about 100 ft<sup>2</sup> of the vehicle to be cleaned, at one time, then follow with the second step solution directly over the first. A fresh water rinse is then applied, and the process is repeated on the next section of the vehicle to be washed.

**Gold Fury Truck and Car Wash has been proven effective in years of field application to yield the absolute lowest cleaning costs per unit of equipment cleaned while giving the best appearance in the industry, and never damaging paint or decals. Often copied, but never duplicated, Gold Fury Truck and Car Wash has proven itself to be the standard by which the transportation cleaner industry measures itself.**
