

Oil Guard

Oil Stabilizer

REDUCE CONSUMPTION | ELIMINATE DRY STARTS

Oil Guard, oil stabilizer, is a premium polymer blend designed to address various engine, hydraulic system and gear box needs. Oil Guard is formulated with high tech additives that proactively address common engine issues.

PERFORMANCE PROPERTIES

- Reduces Oil Consumption
- Eliminates Dry Starts
- Increases Oil Life
- Raises Oil Pressure
- Increases Power and Fuel Mileage
- Eliminates Hydraulic System Leaks

Oil Guard is offered in case gallons.

Oil Guard Oil Stabilizer works to prevent problems before they occur. Oil Guard Oil Stabilizer virtually eliminated dry starts and wear. It also extends oil life and lowers oil temperature in any engine, gas or diesel. It raises oil pressure, stops smoking, leaking, knocking and blow by in worn engines

ADVANTAGES

Oil Guard Oil Stabilizer eliminates noise, overheating, leaks and wear in hydraulic systems and gear boxes.

Oil Guard Oil Stabilizer will blend safely with most other automotive lubricants, even synthetic oils.

Oil Guard Oil Stabilizer protects against rust, corrosion and dry starts for long periods of non-use. Oil treated with Oil Guard Oil Stabilizer will not run off cylinder and gears.

Oil Guard Oil Stabilizer seals the cylinders to keep oil from being burned, it also keeps the contaminants of the combustion chamber from coming down to prematurely ruin the motor oil.

Oil Guard Oil Stabilizer will stop hydraulic system leaks, and help any system run cleaner and cooler.

DIRECTIONS FOR USE

Usage	Ratio	Comments
Motor Oil	1:7	For improved performance
	1:6	For engines with severe blow-by
Hydraulic Oils	1:50	For improved performance
	1:35	For engines with leaks and over-heating problems.
Gear Oils	1:10	For improved performance
	1:7	For gear boxes with leaks and overheating problems.
