

Syn-Dyne T-04

Premium Automatic Transmission Fluid

FOAM PROTECTION | COLD WEATHER STARTING

Syn-Dyne T-04 provides excellent low temperature fluidity for easier cold weather starting, superior corrosion and rust protection and maximum foam protection against entrapped air. This, promotes greater oil life, smoother brake operation, reduced gear wear, controlled power shift transmission friction and more reliable equipment.

PERFORMANCE PROPERTIES

- Superior Oxidation Stabilization
- Corrosion Prevention
- Elastomer Compatibility
- Controlled Friction Properties
- Inhibits Against Foaming
- Excellent Lubricating Characteristics

Syn-Dyne T-04 is offered in 275 gallon tote tanks, 55 gallon drums, or 5 gallon pails. **Syn Dyne T-04** is available in SAE Grades 30W and 50W.

Syn-Dyne T-04

Syn-Dyne T-04 Premium Transmission Fluid is formulated with very high viscosity index base oils, and is fully compatible with other T-04 type lubricants.

PHYSICAL PROPERTIES

Attribute	SAE 30	SAE 40
Viscosity (cSt) @ 40° C	94.6	188.0
Viscosity (cSt) @ 100° C	11.5	18.4
Viscosity (SSU) @ 100° F	491	986
Viscosity (SSU) @ 210° F	66	94
Viscosity Index	111	108
Flash Point, F°	>460	>460
Pour Point F	-40	-34

Syn-Dyne T-04 Premium Transmission Fluid provides outstanding friction performance with both the metallic and nonmetallic friction materials found in today's hi-tech power shift transmissions. The frictional characteristics in Syn-Dyne T-04 Premium Transmission Fluid eliminate excessive brake noise and prevent clutch slippage, even under heavy loads on steep inclines.
